

Kevin Senoner

Software Developer

About me

I am an Italian software developer from South Tyrol with over three years of experience in programming. My most significant role was as a Java backend developer at Durst, where I navigated a large codebase and initiated my own project. This experience exposed me to a variety of coding practices, from poorly structured "spaghetti code" to well-implemented software patterns. As a result, I have gained the confidence to approach new projects with a balanced perspective. I prioritize delivering value to the companies I work for, which often involves making thoughtful trade-offs between maintaining "clean code" and implementing features. My colleagues and supervisors have consistently praised my ability to quickly grasp complex concepts while maintaining a clear overview of the software architecture. I am currently seeking new opportunities as a programmer in any role (backend, frontend, embedded systems, or PLC development)

Experience - 3 years

Java Backend Developer at Durst Group AG, Brixen (Italy)

2022 - present

- Greenfield design and development of the backend server of Durst EditPro
- Assisting the backend tech-lead in planning and implementing the modularization of a existing monolithic application
- Design and re-implementation of a in-house ORM (for PostgreSQL) with 80% test coverage
- DevOps (CI/CD) with Gitlab and Azure

Junior Web Developer at Sportler AG, Bolzano (Italy)

2021 - 2022

- Development of an internal web-app in Vue.js + PHP, now used by all Sportler Stores and Sportler Marketing Team
- Design and development of a microservice architecture to improve the shop's real-time processing on GCP with Golang, gRPC, Redis (Redis Streams, RedisGraph, RedisJSON)
- DevOps (CI/CD) with Bitbucket and GCP

Education

IT and Software Engineering, LBS Tschuggmall, Bressanone

September 2015 – June 2020

Hobbies

Playing the piano, Hiking, Biking

Language skills

English Full professional proficiency

German Bilingual proficiency

Italian Full professional proficiency

Ladino Native

Programming Skills

Java (Spring Boot)

OOP design patterns

JavaScript frameworks (Vue)

SQL (Postgres)

Golang

PHP

Other Skills

Debugging

Git

Linux Command Line

Relational database modeling

Writing CI/CD pipelines

Containerization (Docker)

Public Cloud (Azure / GCP)
