Kevin Senoner

Junior Software Developer

About me

I'm a young technology enthusiast and Software Developer with a passion for finance and open source. I have some experience with **OOP**, but also with **Full-Stack web development**. I have worked with a variety of technologies, reaching from programming microcontrollers with Assembler and C to building web applications with React and Node.js, building Desktop applications with C# and Java, installing and maintaining Linux and Windows servers, programming industrial PLC computers, designing and implementing relational databases, designing and programming computer networks with switches and routers and developing mobile applications.

I like to explore new and old technologies and automate all of my repetitive tasks. My personal interests include volunteer work, making music, cryptocurrencies and self-improvement.

I am currently actively looking for any open position as Software developer, Web developer, DevOps engineer or similar.

Hobbies

Playing the piano, Hiking, Biking

Language skills

Language	Proficiency
English	Full professional proficiency
German	Bilingual proficiency
Italian	Full professional proficiency
Ladino	Native

Programming Skills

HTML and CSS
JavaScript
C# / Java (OOP)
PHP
Golang

Other Skills

Git
Linux server administration
SQL (Relational databases)
Networking
Agile Methodologies
Docker products
Relational data modeling
